

Harshit Sharma (Backend / Full Stack Developer)

Phone: 9053126936 GitHub: Githarsh94 LinkedIn: Harshit Sharma Email: 9417harshit@gmail.com

PROFESSIONAL SUMMARY

- Software Engineer with experience in database migration, cloud infrastructure, and scalable system design, building production-grade applications with modern web technologies.

EDUCATION

- Chitkara University (B.E - Computer Science; **CGPA: 9.54** - Punjab, India) Oct 2022 – Jul 2026

WORK EXPERIENCE

- Xperi (On-site) (Software Engineer Intern - Bangalore, India) August 2025 – July 2026
 - Migrated 60+ SQL Server jobs and schemas to PostgreSQL on GCP, improving system resilience and cost efficiency.
 - Developed migration scripts in **Python** and built a data comparison tool in **GoLang** to ensure data integrity during transitions.
 - Optimized SQL Server queries and ETL workflows; cloud migration resulted in a **95% reduction in scheduled maintenance downtime**.
 - Automated resilient CI/CD rollouts using **Helm charts** and **ArgoCD** for containerized microservices on Kubernetes.

SKILLS

- Programming:** Python, C++, Java, JavaScript/TypeScript, GO, SQL. Strong DSA skills (350+ LeetCode problems).
- Backend & Databases:** Flask, Node.js, Express, Spring Boot, REST APIs, LLMs, AI, PostgreSQL, MySQL, MongoDB, Database Migration, Scalability.
- Cloud & DevOps:** GCP, Kubernetes, Docker, Helm Charts, ArgoCD, CI/CD, Linux.
- Tools:** Git, Github, SQL, Vercel, Render
- Web Development:** React, Next.js, HTML, CSS, Full-Stack Integration.
- Core Coursework:** Data Structures & Algorithms, Databases, Operating Systems, Computer Networks, OOP.
- Additional Skills:** System Resilience, Agile Methodology (ZenHub), Problem-Solving.

PROJECTS

- JalJira (Agile Project Management System (Full-Stack)) Feb 2026 – Present
 - Overview:** Architected a scalable platform with OAuth2/OIDC and RBAC (Admin/Manager/Member), featuring high-performance hierarchical task tracking via materialized paths for optimized recursive queries. Engineered a (Junior Dev Agent) to resolve minor issues utilizing MCP for tool execution and RAG via pgvector for context.
 - Tech Stack:** Next.js, Tailwind CSS, Spring Boot 4, Spring AI, MCP, LLMs, PostgreSQL (Supabase, pgvector).
- Ampskill (Online Assessment Platform (Scalable Backend Focus)) Aug 2024 – Jan 2025
 - Overview:** Built a scalable online testing platform using analytics and AI to improve academic performance.
 - Tech Stack:** Next.js, Node.js/Express, MongoDB, Gemini API for AI-powered question generation with a backend-focused architecture.
- KMS Connect App (Community App (App Store & Play Store)) Jul 2023 – Sep 2023
 - Backend/Mobile:** Developed a community app using React Native (Expo), Supabase, and TypeScript, plus an admin panel in Next.js.
 - Features:** Implemented directory, donation management (Razorpay/UPI), loan workflows with document upload and admin approval.

ACHIEVEMENTS

- Byte Tourney Hackathon (Winner – Student Developer) Feb 2024
 - Innovation:** Built and presented a full-stack solution under strict time constraints.
 - Skills:** Applied Agile principles to deliver a working prototype in a high-pressure environment.
- Electrothon 6.0 (Track Prize Recipient) Mar 2024
 - Innovation:** Built an app generating dynamic video clips from textual prompts.
 - Recognition:** Won track prize for best use of Taipy among 100+ teams.
- ShopClues Smart Cataloging Hackathon (Winner – Student Developer) Mar 2024
 - Objective:** Built a cataloging system reducing product listing time by 50%, selected top 10 for live demo.

HOBBIES

- Tinkering with Electronics:** Passionate about diagnosing and repairing consumer electronics, demonstrating hands-on problem-solving and systems knowledge.
- Inline Roller Skating:** Practice skating for creativity and relaxation. *District Champion (Under 14).*
